

## PRODUCT INFORMATION SHEET

### CarPlan Flat Mate Emergency Puncture Repair

#### **DESCRIPTION**

*“Your best friend when stranded with a flat tyre in the dark, on the motorway, or in the rain...”*

Flat Mate is a quick, easy, “get you home” repair. No wheel change is necessary and no tools or dismantling required. Suitable for use in cars, caravans, campervans, trailers and some motorcycles. Flat Mate is not suitable for bicycle tyres or motorcycle tyres with tubes – it is only suitable for use with tubeless tyres.

#### **ADVANTAGES**

- Suitable for all cars, vans and 4x4's
- Re-inflates & seals tyres... fast!
- No tools or dismantling required.

#### **DIRECTIONS FOR USE:**

1. If possible, remove the object which has caused the puncture and deflate the tyre completely. Shake can vigorously before use (NOTE: In cold weather, warm the can first using your hands or from the heater inside your car)
2. Move vehicle to position the tyre valve to the top of the wheel. Clear the valve and screw the Flat Mate tube onto the valve
3. Remove the cap cover, hold the can inverted and press the button to release the foam until the tyre is firm.
4. Immediately drive car for approximately 6-8 miles (10-14km) to allow Flat Mate to spread evenly in the tyre and seal the puncture.
5. Check and adjust the tyre pressure as required

FLAT MATE IS SUITABLE FOR ALL TYRES 17" AND UNDER.

#### **IMPORTANT**

Please remember Flat Mate is not a permanent repair. It is a temporary repair designed to get you home. The tyre must be repaired or replaced as soon as possible. Do not use Flat Mate if the tyre is displaced from the wheel rim, or if the damage is to the tyre wall, or if the tyre is ripped, or if the tyre has a large hole (larger than 5mm). Travel at reduced speed (max 30mph/45kph). Inform tyre repairer that Flat Mate has been used and show can before repair work is carried out. Store can securely in car boot.
