

PRODUCT INFORMATION SHEET

TETRION POWERFIL 2K FILLER

DESCRIPTION

Tetrium Powerfil 2K Filler is a super smooth multi purpose filler, ideal for large and small jobs. Sets in minutes, creating an easy to sand, very tough and very smooth repair. Kit contains hardener, spreader and mixing dish. Suitable for metals, wood, stone and most plastics.

DIRECTIONS

1. Prepare surface by removing all dirt, grease, moisture and loose material from the area to be treated. Also ensure all mixing equipment is clean.
2. Mix 1 part hardener to 50 parts filler (pea : golf ball) or 2%. Mix thoroughly until all the coloured hardener is dispersed and no coloured streaks are evident.
3. Apply filler immediately with the spreader. Setting reaction commences after 5 minutes and paste will become fully cured and sandable after 20 minutes (at an ambient temperature of 18°C/65°F).
4. Sand the repair down to the level only when paste has fully set.
5. Correct any imperfection with more filler mixture, only after application has cured.

Note: Tetrium Powerfil 2K Filler is best used in warm, dry, well-ventilated conditions. In hotter temperatures the filler mix will set more quickly. In cooler conditions the filler will take longer to cure completely. If necessary, mix a small quantity of filler and hardener to test curing time.

AVAILABILITY

250ml – TTK250

600ml – TTK600

1L – TTK001

2L – TTK002

3.5L – TTK035
